Revenue that traditional workflows overlooked.

THE REVENUE CHALLENGE FACING ESSENTIAL HOSPITALS

Essential hospitals face growing financial pressure from uncompensated care, Medicaid underpayments, and limited resources.

IN 2023, ESSENTIAL HOSPITALS REPORTED

$11B
in uncompensated care

$11.4B
in additional under-reimbursed care

H.R. 1 adds further financial pressure, making revenue optimization increasingly critical.

Source: America's Essential Hospitals, Essential Data (2025)

Patients often arrive after workplace incidents, motor vehicle accidents, or injuries involving another liable party. Registration and billing workflows may not consistently capture or resolve:

01 Whether the injury occurred while the patient was working

02 Whether a motor vehicle or other third party may be responsible

03 Whether another insurer or payer should be investigated

04 Whether the hospital has the right claim, attorney, or payer information

05 Whether a hospital lien is available, documented, and followed up

06 Whether unresolved cases need investigation after discharge

WHERE THE REVENUE GOES

Injury-related encounter
Workplace injury, motor vehicle accident, or incident involving a third party

↓

Responsible payer missed
Not identified at registration, or identified but not followed through

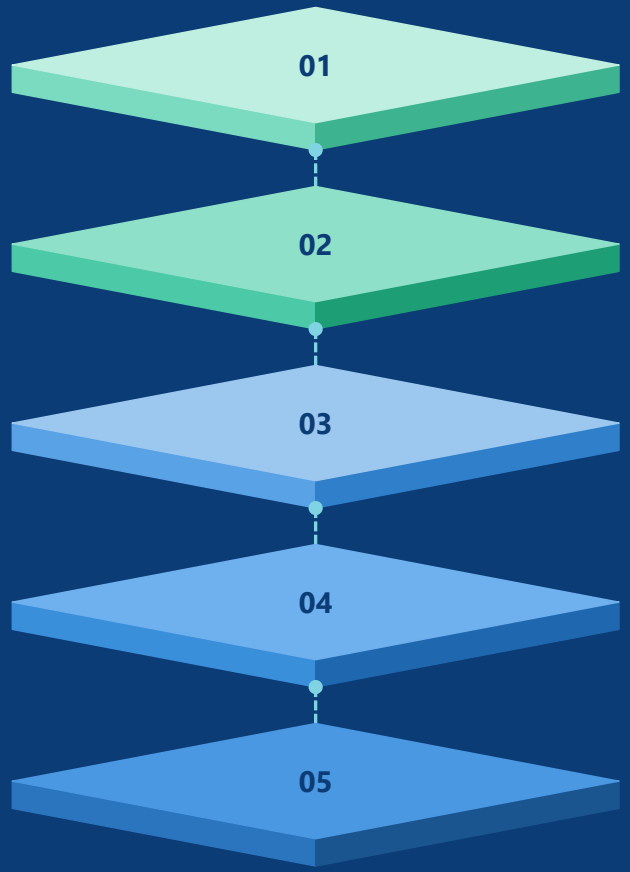

↓

Absorbed by the hospital
Written off as bad debt or uncompensated care

THE CONSEQUENCE

Valid reimbursement opportunities may remain unidentified, incorrectly routed, delayed, or insufficiently pursued.

The LaborForce solution.
A specialized operational layer.

01 — Proactive Revenue Identification
Review injury-related encounters, identify potentially responsible payers, and prioritize accounts for investigation.

02 — Dedicated Patient Engagement
Outreach to verify injury circumstances and collect missing claim, employer, insurer, or attorney information.

03 — Payer Verification & RCM Coordination
Coordinate findings with registration, billing, and revenue cycle teams for payer determination and follow-up.

04 — Revenue Auditing & Reconciliation
Monitor unresolved cases, flag missing or inconsistent information, and track case status and reimbursement.

05 — Lien Administration & Recovery
Support approved lien documentation, follow-up, and reimbursement tracking within the legal and contractual framework.

LaborForce works alongside your billing and collections teams.

Turn hidden revenue opportunities into visible results.

PLANNING INPUTS

01 Annual ED encounters — 150,000
